Food For Health Seminar Series

J. Mark Brown, PhD

Professor & Director of Research
Center for Microbiome & Human Health
Cleveland Clinic

“Metaorganismal Endocrinology: Microbe-Host Interactions in Health and Disease.”

Dr. Brown will discuss several ongoing projects aimed at understanding diet-microbe-host interactions that produce bioactive metabolites that systemically circulate. These gut bacterially-derived metabolites are then sensed by host receptors to elicit effects on normal physiology as well as impacting cardiometabolic disease progression.

Friday, September 27th, 2024

Reception: 11:30 am

Seminar: Noon-12:55 pm

Food Innovation Center (FIC): Room 277
