"Identification of Antigens for Food Allergy and Food Allergen Detection"

I am Ellenor Sell, a master's candidate in Food Science and Technology at the University of Nebraska - Lincoln. Join me for a presentation and discussion over my work developing LCMS methodologies for characterizing antigen-antibody interactions relevant to food allergen detection and food allergy. I hold a bachelor's degree in Food Science and Technology. I have spent six years working in laboratories for the university and FARRP. My areas of expertise are in food allergens, LCMS, and antibody research.
